

Full-Stack-JavaScript Intern (m/f)

Join our startup as an intern in our Magdeburg or Berlin office for at least three months and get to know the latest technologies like Angular 2 and node.js. We are an IT-experienced, diversified team and are about to change the way scientific research is being produced - together.

Responsibilities

- Support the development team (backend or frontend) and learn Angular 2 or node.js.
- Execute and create usability, unit- and component tests.

Your profile

- German or English speaking.
- You are a student, want to work for a startup and learn new technologies and methodologies: Agile development, HTML5, DevOps, Docker and JavaScript/TypeScript/ES6.
- You have solid programming knowledge in at least one programming language: JavaScript would be a plus.
- You are quick at picking up new things, e.g. using GIT or new frameworks like Angular 2.

We offer you

- We will support you while learning the newest from the Full-Stack-JavaScript eco-system: Angular 2 & Node.js.
- Benefit from our network with large and small companies and start building or grow your network.
- We provide Club Mate ,Coffee, Tea, Water as well as full team events in Berlin and Magdeburg and ping pong competitions

Next Steps

If you'd like to learn more, visit our [website](http://en.sciflow.net/intern) at <http://en.sciflow.net/intern> and send us your application to together@sciflow.net. We're looking forward to it!
